

CERTIFY FOR ENTERPRISE

# (ISC)<sup>2</sup> CISSP

## The industry standard for security professionals.

For organizations looking to the future, it is important to leverage talent with wide and ranging knowledge and expertise. To advance your technical security professionals, consider the Certified Information Systems and Security Professional (CISSP) credential from (ISC)<sup>2</sup> for your team upskilling efforts.

The CISSP is an advanced certification designed for experienced practitioners, managers, and executives, covering a wide range of cybersecurity topics from a highly technical perspective. It is a great way for employees to expand on their expertise and hone the skills necessary to effectively engineer and implement complex enterprise security initiatives.

As an (ISC)<sup>2</sup> Official Training Provider, CyberVista's Online CISSP Training Course enables employees to validate their cybersecurity skills and capabilities as they prepare to earn the CISSP certification. Our course includes a Computerized Adaptive Test (CAT) final exam assessment and trains for the most up-to-date version of the exam.

Use this Anatomy of the CISSP guide to understand what makes up the exam, the process to earn the CISSP, how to best prepare your team, the benefits of certification, and, ultimately, how CyberVista can help your team get on the fast track to become CISSP certified.

WHAT YOU'LL NEED TO KNOW

# Setting Your Team Up for Success

## STEPS TO CERTIFICATION

Qualifying individuals must have at least five years of cumulative, paid, full-time work experience in two or more of the eight domains of the (ISC)<sup>2</sup> CISSP Common Body of Knowledge (CBK). If some individuals do not have enough work experience, there are two options to proceed with becoming a CISSP. First, a four-year college degree or an approved credential from the CISSP Prerequisite pathway\* can satisfy one year of required experience. Secondly is to take and pass the CISSP exam to earn an Associate of the (ISC)<sup>2</sup> designation.

**MAINTENANCE FEES**

**\$85 / year**

**ANNUAL REQUIREMENT**

**40 CPEs**

**THREE-YEAR REQUIREMENT**

**120 CPEs**

**EXPERIENCE REQUIREMENT**

You must have at least five (5) years of cumulative, paid, full-time work experience and it must cover two or more of the eight domains.

**EXPERIENCE SUBSTITUTION**

(ISC)<sup>2</sup> allows you to substitute a one year maximum credit of the five-year work experience requirement. Substitutions are not cumulative.

**ASPIRATIONAL PROGRAM**

The Associate of (ISC)<sup>2</sup> program allows you to earn a credential for meeting all other requirements for the CISSP outside of experience. Once you meet the experience requirement, you will become a fully certified CISSP.

**REQUIREMENTS SUMMARY**

1

MEET THE EXPERIENCE REQUIREMENT OR APPLY TO BECOME AN ASSOCIATE OF (ISC)<sup>2</sup>

2

EVALUATE YOUR TEAM

# Benefits of Certifying Employees

The knowledge and skills obtained from the Certified Information Systems and Security Professional credential can provide significant benefits for your team and organization. Here are additional benefits to consider when offering team training for this in-demand certification.

### 1. Validation of your skills and capabilities

At a minimum, earning the CISSP validates your commitment to a career in cybersecurity. Achievement of a certification showcases a level of commitment, diligence, and aptitude giving you credibility as a cybersecurity practitioner.

### 2. Screening mechanism for HR

According to Burning Glass, more than 33% of cybersecurity job postings require a recognized certification and a much larger number mark certification as a preferred credential. HR professionals activate key word screens to include those magic certification letters. Without a certification like the CISSP, you might not even make it through the first pass.

### 3. DODD job requirement 8140/8570

DoDD 8140 was signed in 2015 and serves to establish policies and assign responsibilities for managing the

U.S. Department of Defense’s cybersecurity workforce. 8140 is an update to the original directive, DoDD 8570, which outlines the baseline qualification requirements for information security jobs. In short, if you want to work for the government or military, then certifications like, and including, the CISSP are required for many ranks and roles.

### 4. Improve Onboarding and Upskilling Efforts

Whether you’re preparing newly hired employees or looking to refresh the skills of current cybersecurity staff, certifications help affirm your team’s understanding of the implications behind their roles and the ability to perform their jobs well.

### 5. Increase Employee Engagement and Retention

Employees will stay with an employer that invests in their professional development. Providing relevant certification training for current or aspirational roles ensures employees feel supported for every step in their career journey within the organization.

# The CyberVista Training Experience

Our courses are designed to work around your team’s schedule and provide all the tools necessary to set your employees up for success and pass the CISSP. Unlike gray market training providers, CyberVista’s courses are led by (ISC)<sup>2</sup> certified instructors in addition to CyberVista being one of few listed as an (ISC)<sup>2</sup> Official Training Provider in North America.

CyberVista’s course covers all eight topic areas of the CISSP exam. As a Live Online program, the course is conducted over eight (8) live, instructor-led online sessions plus an orientation session. All sessions are recorded and included within the learning management system (LMS) for added review.

Here’s what you can expect from the CyberVista training experience:

## High Engagement

Variety of study tools offered to address multiple learning styles, including quiz banks, flashcards, labs, guided and hands-on CTF exercises, and much more. Virtual review sessions help identify where additional assistance might be required.

## Scalable

Our 100% online solution allows you to choose a schedule and format that works best for your team.

## Data-Driven

Robust reporting and performance tracking drives accountability and engagement throughout the engagement.

## Efficient

Based on initial diagnostic assessments, employees receive configured course content that focuses only on specific knowledge gaps or weak areas, and none of what they already know.

# Certify with CyberVista

When it comes to certification training, we know that you and your organization have several options to choose from. This is what separates CyberVista from the pack.

## Data Driven

Live reporting provides an objective view of performance and progress.

## Affordable

Total costs average 50% less per person compared to traditional providers.

## Effective

Drive real results with high-quality training and practical applications.

## Tailored

Designed to adapt to the organization and the individual employee.

## Our Mission

**Transforming today's workforce to meet tomorrow's cybersecurity challenges.** As a workforce development company, we are working diligently to strengthen organizations by providing cybersecurity professionals with the knowledge and skills needed to drive defense.

Founded in 2016, CyberVista benefits from the rich 84 year history of Kaplan—one of the world's premier training providers—as its sister company and ally. In 2018, CyberVista welcomed Transcender into the brand. Transcender brings over 25 years of helping organizations and practitioners build technical job skills across all areas of IT and cybersecurity.

"In 30 years in the Army this was the best training I've ever attended. Every Signal and Cyber Soldier in the Army needs to take this [Security+] course whether they need the certification or not."
